with Extra Device-Print on Crystal Film Directly

Optional

6 Fluorescent color Printing, **7** Gold color Solution

Products Configurations

Model	A3 Smart Printer
Printer Type	Digital Inkjet Printer
H S Code	84433221
Printhead	Epson i3200 U1HD, 3.5PL, 8 channels. Typically for UV use.
Printhead Quantity	1 unit
Max. Support Color	8 colors (printhead is with 8 nozzle lines)
Printing Speed	0.28-3 m ² /hour
Max. Print Resolution	720*1200 dpi
Max. Print Area	297*420 mm
Print Format	White+Color+Varnish Synchronous
Printing Ink Consumption	1 SQM print consumes no more than 15ml totally
A3=(297*420mm)=0.12474 sqm	A3 size print consumes 1.87ml ink
A4=(297*210mm)=0.06237 sqm	A4 size print consumes 0.93ml ink

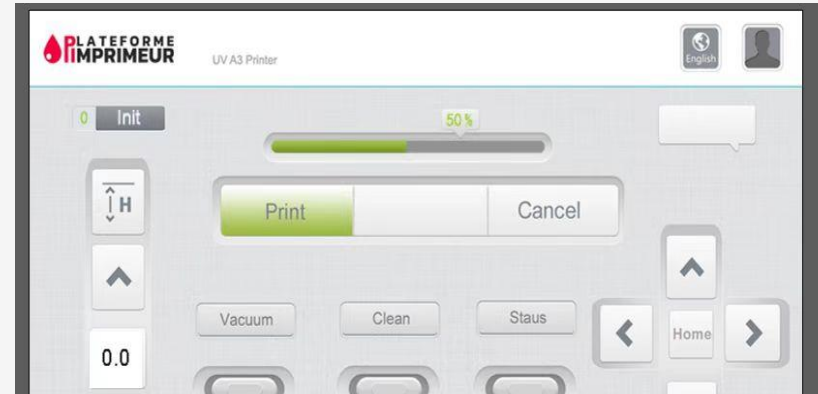

Products Configurations

Model	A3 Smart Printer
Color Format	CMYK+W+V
	CMYK LC LM+W
	CMYK LC LM
	CMYK
Print Thickness	0-95mm
Ink Model	UV Ink
Ink Bottle	250ml per bottle
Ink Storage Environment	Shading, Temperature 20-28 °C, Humidity 35%-65%
Connection Mode	Internet Cable
Graphic Format	Tiff, JPG, EPS, PDF, PNG
Power	AC220/110V, 50HZ-60HZ
Printer Dimension (L*W*H)	1.0×1.0×0.65m Net Weight 98KG
Packing Dimension (L*W*H)	1.18*1.03*0.8m=0.97cbm 125KG

Product Advantages

Multifunction Touch Screen 7inches Control Panel

12 languages options.

Product Advantages

Product Advantages

1. The resolution is up to 1200dpi, and realize up to 8-color output
2. Lightweight design, compact body, does not take up space
3. Humanized design operation panel, convenient and fast.
4. Various functions, support flat and roll printing
5. White, color, varnish output at the same time.
6. Smooth installation in 10 minutes

Product Advantages

EPSON i3200 U1HD Printhead

High-resolution, photo-quality output

Lifting Suction Platform

High-precision honeycomb hard aluminum platform, the flatness is controlled within 0.1mm

Inlet

Outlet

Product Advantages

Intelligent Ink Supply System

Brand-new ink cartridge design, with automatic ink circulation and ink shortage alarm function

Lifting Ink Station Design

The motor drives the ink station up and down, precisely controls the position of the carriage, and protects the nozzle much better
